**Welcome**

The Gokart Kit is an accessory developed specifically for the Ninebot by Segway products listed below. When the Gokart Kit is attached to the appropriate Ninebot by Segway product it becomes an electric Gokart. You must read and follow these instructions as well as the instructions provided with the applicable Ninebot by Segway product.

**WARNINGS**

- To reduce the risk of injury, adult supervision is required. Never use in roadways, near motor vehicles, on or near steep inclines or steps, swimming pools or other bodies of water; always wear shoes, and never allow more than one rider.
- Always fasten seat, wear a helmet with long hair tucked inside and wear protective gear. Loose clothing or hair can become stuck in wheels or block your vision. Wear approved closed-toe, secure footwear. No loose clothing.
- Do not ride in rain or snow. When not in use, park the Gokart indoors to avoid water entering and damaging the vehicle.
- Comply with all local laws and regulations.

**Riding Safety**

1. Be sure the Gokart is powered off before performing any maintenance or when installing or replacing parts.
2. When installing components, use proper and sufficient force until the component is secure. If the installation is too loose or too tight, the Gokart may not function properly resulting in the potential for injury to you or others or damage to, or destruction of, the Gokart.
3. Install batteries for the Gokart in accordance with the instructions and ensure that the positive and negative terminals of the batteries are installed correctly. Only use the batteries specified by the manufacturer. Do not charge the batteries as this may cause a risk of explosion or leakage, and could cause a collision.
4. Ensure that the battery level and vehicle operating status are within the specifications contained in the manual of the model being used with the Gokart Kit.
5. Carefully read, understand and follow all instructions in this User Manual and watch and understand the video tutorial at the Ninebot website before your first drive. It is not intended to drive the Gokart if you are not able to drive in accordance with the instructions in this Manual or you risk serious injury or death.
6. Always wear appropriate shoes, clothing, and protective gear when riding. The package includes the use of helmet, knee pads, and elbow pads (not included). Also an approved license or skateboard helmet is highly recommended with the use of the kit. Protective gear protects the head of your face, back, or both areas. Knee pads help protect the knees. Wrist guards protect the hands. Protective equipment will help reduce the risk of injury.
7. Do not drive the Gokart on any road or street that has a speed limit.

**Where to Drive**

1. When entering public spaces, always comply with the instructions and regulations. Only ride in areas where you have first obtained permission from the property owner.
2. The Gokart is designed to drive on a dry, flat, hard-surface, free of obstacles, bumps, holes, and other hazards.
3. The types of surfaces which are appropriate for safe use of the Gokart.
4. Do not drive on roadways, near motor vehicles, pedestrians, bicyclists, animals, or near steep inclines or steps, swimming pools or other bodies of water. Use caution when riding in areas with trees, posts, or fencing. You must have sufficient space between you and those around you to avoid collisions.
5. Be alert! Scan both far ahead and in front of you. Your eyes are your best tool for safely avoiding collisions.
6. Be versatile: look around corners, read through crosswalks, or other areas with potential hazards. You must have a clear view of your surroundings to avoid obstacles.
7. Do not ride at unsafe speeds. You must always use good judgment based on your driving skills and the surrounding environment.
8. Always slow down when turning. Turning at a high speed can cause loss of control possible serious harm and/or death.
9. Do not perform stunts at any time. All four tires must remain in contact with the ground at all times.
10. While driving the Gokart, always remain seated with arms and legs inside the Gokart, and do not carry anything on your person. Do not carry any load that could obstruct your vision or interfere with your ability to control the vehicle.

**Handling & Use**

1. The Gokart is a mechanical product. Before mounting riding skills, you need to practice. Neither Ninebot (Ningbo) Technology Co., Ltd. or its subordinates and affiliates nor Segway Inc. is responsible for damage or injury caused by improper use or failure to follow the instructions in this User Manual or in the fee Tutorial.
2. Never ride with any kind of transportation, that whenever you drive the Gokart, you risk injury or death from loss of control, collision, and/or fall. You can ride with only one rider on the Gokart Kit. Each rider must be able to clearly see what is in front of them and be able to stop the Gokart Kit.
3. The Gokart Kit contains small parts which can cause a choking hazard. Keep small children away from the Gokart.

**Pre-Ride Checklist and Preparing for Your Drive**

1. Before each drive check and tighten any loose parts, fasteners, straps, and replace damaged components.
2. To avoid accidents caused by improperly inflated or in time, check the tire pressure on the minipro tires and rear tires at the back wheel axle. Do not exceed max pressure in any condition.
3. Ensure that the battery level and vehicle operating status are within the specifications contained in the manual of the model being used with the Gokart Kit.
4. Carefully read, understand and follow all instructions in this User Manual and watch and understand the video tutorial at the Ninebot website before your first drive. It is not intended to drive the Gokart if you are not able to drive in accordance with the instructions in this Manual or you risk serious injury or death.
5. Always wear appropriate shoes, clothing, and protective gear when riding. The package includes the use of helmet, knee pads, and elbow pads (not included). Also an approved license or skateboard helmet is highly recommended with the use of the kit. Protective gear protects the head of your face, back, or both areas. Knee pads help protect the knees. Wrist guards protect the hands. Protective equipment will help reduce the risk of injury.
6. Do not drive the Gokart unless it is parked on flat ground.

**Contact information**

- **Ninebot Service**
  - The manufacturer recommends drivers be at least 8 years old. Children under the age of 13 should only drive under adult supervision. Always follow these safety instructions:
  - A. People who should not drive the Gokart include:
    - Anyone under the influence of alcohol, drugs, or intoxicants.
    - Anyone who suffers from illness that puts himself/herself at risk if he/she engages in strenuous physical activity.
    - Anyone who is not physically and mentally capable.
  - B. The Gokart is intended for one person only.
  - C. To reduce risk of injury, always wear protective gear. You must be able to see what is in front of you and you must be able to see what is behind you.
  - D. Drive only in environments where you can clearly see what is in front of you.
  - E. Drive only in environments where you can clearly see what is behind you.

Operating the miniPRO

The Gokart is assembled by attaching the Gokart Kit to a miniPRO. Before assembly of the Gokart, please review the miniPRO User Manual and follow all instructions contained in it. Once the miniPRO has been properly activated and charged you can begin assembly of the Gokart.

- **Update the miniPRO firmware**
  - Install the app
  - Download the Segway-Ninebot app (hereinafter referred to as the app)
  - On the Ninbot settings page, tap “Gokart mode”
  - Enable “Gokart mode”.

> *The firmware update does not involve activation of the miniPRO. If you need to use the miniPRO, please refer to the miniPRO User Manual for related operations.*

- **Pair your mobile phone and the miniPRO**
  - Turn on your phone’s Bluetooth
  - Press the power button to turn on the miniPRO
  - Open the app to search for and connect your miniPRO

> *The miniPRO can be found within 100 feet of the smartphone. As long as the Bluetooth connection is maintained, you can enter it in a reduced signal environment.*

- **Update firmware and switch modes**
  - In the upper right corner of the app, tap “Settings”
  - Firmware Update
  - On the Ninbot settings page, tap “Gokart mode”
  - Enable “Gokart mode”.

> *This is for individuals who need to use the miniPRO while it is not ready.*

Assembling your Gokart (Requires two adults to assemble)

1. **Download the Segway-Ninebot app**
2. **Install the app**
3. **Open the Segway-Ninebot APP and connect your Gokart.**
4. **Update the miniPRO firmware** safely, then the speed limit can be gradually raised.
5. **For your safety, the default values of the Gokart speed and height are appropriate for the rider.**
6. **Check the status of the miniPRO**
7. **Assemble Gokart**

5. Driving the Gokart

Press the power button on the miniPRO to turn on the Gokart. The Gokart will automatically power off when idle for 10 minutes.

Open the Segway-Ninebot app and connect your Gokart.

Follow the instructions in the app to activate the Gokart and complete the corresponding tutorial and exercises.

Use and charging

- **Fastening the seat belt**
  - Sit down and buckle the belt around your waist.
- **Braking**
  - **Emergency braking**
  - When the Gokart is stopped, press the brake (left pedal) to make it steady.
  - **Avoid running**
  - When the Gokart is stopped, press the brake (left pedal) to make it steady.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.
— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

Industry Canada (IC) Compliance Statement for Canada
This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

CAN ICES-3 (B)/NMB-3(B)
Neither Segway Inc. nor Ninebot is responsible for any changes or modifications not expressly approved by Segway Inc. or Ninebot. Such modifications could void the user’s authority to operate the equipment.
